Field of the Invention The present invention relates to an image processing apparatus having a function for extracting a specific character portion from an image and, more particularly, to an image processing apparatus which changes or changes both a density and a color tone in a specific character portion by a function different from that for changing or changing both a density and a color tone in the entire image. 2. Related Background Art There is already known a method for extracting a specific character portion from an image, by using a characteristic point, for example, a color and density thereof, which is referred to as a so-called "white point" among observers. However, in the case where the entire image is composed of specific characters, when a specific character portion is extracted from the entire image by using a so-called 2d92ce491b
