
The Trilogy - And Then Some - By Dan And Dave Buck

Download

The Trilogy, Dan and Dave Buck's landmark instructional DVD, which chronicles the world's greatest card tricks. Dan and Dave are no strangers to magic. They've performed in London, New York, Dubai and all over the world. They're also the creators of the influential The Card Trip, which helped inspire some of the greatest card routines today. This DVD isn't just for card tricks. It's a no-holds-barred journey into the minds of the greats. Dan and Dave explain why they teach card magic the way they do, why they love the tools of their trade, and, most importantly, what makes tricks great. The Trilogy is a three disc DVD set that explains over six hours of card tricks, flourishes and everything else Dan and Dave have dreamt up with a deck of cards. Add to Cart If you are a fan of my style, don't hesitate to order one of my journals. You'll be receiving a beautiful keepsake, made by my hand. Every journal is handmade, and the finishing touches make each one of them different. I believe in getting to know my customers and their style. I know that you are unique. I think that's what makes my style so special, as there are not many other florists who create such fine and individual pieces. I am grateful to have met so many creative people over the years. In turn, I have learned so much from each of them. Your order will be shipped within 1-2 business days upon receipt of your payment. Once the order is shipped, I will send you an email to notify you that the order is ready to be picked up. The shipping time depends on the location and the size of the package you choose.Q: Get all features from a shapefile I'm using ArcGIS 10.1.1. I need to open a shapefile (MS SQL Server) and read all features from it. The shapefile is 200MB large, and I don't want to open it at a time. I was thinking of looping through it one time, to get the total number of features. Then, I can open it, use OLE for Excel automation (it is a.xlsx) and read the numbers. Then, close
